KEY FEATURES FOR MATH TEACHERS

GradeCam can help quickly score and record common assessment types in Math classrooms, including:

01. **RUBRIC WITH CAPTURE**

Use open capture areas to digitally “clip out” any type of drawn/written student work for grading on-the-go.

02. **HANDWRITTEN NUMERIC**

Utilize our newest technology to read and grade any numeric math response with remarkable accuracy.
**GRIDDED ANSWERS**

Customize vertical columns with numbers and mathematical symbols for students to bubble in final answers for quick grading.

**CONSTRUCTED RESPONSES**

Utilize rubrics through teacher-completed questions (i.e. #2, #4 & #6 in the example above) while evaluating written work to record student achievement on a predetermined scale (i.e. "No Credit," "Partial Credit," or "Full Credit"), scan completed GradeCam forms to instantly capture and analyze data, and then automatically transfer grades into any electronic gradebook.
WRITTEN ASSIGNMENTS

Embed GradeCam forms on lined paper for written work, and then simply bubble in student scores for easy scanning and automatic grade recording.

CREDIT/NO CREDIT

Embed GradeCam forms anywhere on worksheets to quickly and easily allocate points (i.e. homework completion). If a student completes the task/assignment/requirement, simply scan this form and the student instantly receives full credit for the assignment. If the form isn’t scanned, the student does not receive points.
